SUMMARY

Software/AI Engineer with production experience designing and integrating **agentic systems**. Built and deployed a **multi-agent RAG solution** using Google ADK's agent orchestration and MCP-based tool-calling, backed by a Vertex AI retrieval pipeline (chunking, embeddings, enterprise-scale vector search) engineered to translate complex customer requirements into secure, reliable technical solutions. **IIT Hyderabad** graduate with end-to-end full-stack delivery experience, trained in Japanese business communication for direct stakeholder engagement. Currently pursuing the Google Cloud Professional Machine Learning Engineer certification. Comfortable operating independently on complex, cross-functional projects in fast-paced environments.

EXPERIENCE

Systems Development Engineer

Tomato CO., Ltd. | GitHub Repo

Tokyo, Japan
Nov 2025 – present

- Designed and deployed a customer-facing **multi-agent** integration over an internal knowledge base, architecting secure data flows between internal systems using Google ADK agent orchestration, MCP-based tool integrations, and Vertex AI embeddings/vector retrieval.
- Engineered the end-to-end **retrieval pipeline** implementing document chunking, embedding generation, semantic search, agent orchestration, tool invocation, and structured response validation with a focus on minimizing incorrect outputs in customer-facing use.
- Partnered directly with **Japanese-speaking customer stakeholders** to gather requirements, understand operational workflows, translate business needs into technical designs, and align the solution with customer expectations.
- Delivered a full-stack internal **Asset-Management application** (Angular, TypeScript, Tailwind CSS, QR-code-based tracking) end-to-end, **cutting down manual register-tracking effort by 80%**; built reusable components and implementation documentation for long-term maintenance.
- Technologies:** *Python, Google ADK, MCP, Streamlit, Google Cloud (Vertex AI), Angular, TypeScript, Tailwind CSS, Google Sheets*

Generative AI Engineering Intern

Kore.ai

Hyderabad, India
July 2024 – Aug 2024

- Engineered custom **chat templates** and fine-tuned a language model for a test-dataset generation pipeline validating function execution in an internal Python development environment, automating and **reducing testing time by 87%**.
- Designed a **structured evaluation matrix scoring** multiple deployed LLMs on intelligence, utility, and operational performance, **directly informing the team's model-selection** and enterprise deployment strategy.
- Developed hands-on expertise in enterprise LLM production workflows: **inference optimization, token management, fine-tuning**, and structured output generation for scalable deployment.

Computer Vision / ML Intern

Ojas Innovation Technologies Pvt.Ltd

Hyderabad, India
May 2024 – July 2024

- Built a **face-attribute recognition model** using custom **CNNs**, achieving **95% AUC and 90% binary accuracy**; developed an end-to-end computer vision pipeline covering preprocessing, augmentation, training, validation, and inference.
- Improved model performance through **systematic hyperparameter** tuning, learning-rate scheduling, batch-size optimization, and regularization.
- Technologies:** *Python, TensorFlow, CNNs*

PROJECTS

Recipe Dictionary with Shopping Cart [GitHub]

- Extended an existing open-source Angular application with expense-tracking, shopping-cart, and nutrition-analysis features, demonstrating the ability to understand and extend an unfamiliar codebase without a rebuild; reduced monthly food expenses by 40%.
- Technologies:** *Angular, TypeScript, Firebase, Tailwind CSS.*

SKILLS

Languages: *Python • TypeScript • JavaScript • C++ • C*

AI/Agentic Integrations: *RAG • Agent Orchestration (Google ADK) • MCP based Tool Integration • Prompt Engineering • LLM Evaluation • Embedding • Vector Retrieval • Fine Tuning*

Libraries & Frameworks: *Node.js • React.js • Express.js • Angular • FastAPI • Astro.js • Firebase • HTML • CSS*

Data & Cloud: *Google Cloud Platform (GCP) • Firebase • MongoDB • Vector Databases*

EDUCATION & CERTIFICATIONS

IIT Hyderabad, B.Tech

2021 – 2025

GPA: 7.72 / 10.0

- Pursuing *Google Cloud Professional ML Engineer*

ACHIEVEMENTS

- Solved **475+ algorithmic problems** on LeetCode, earning a 365-days consistency badge and 15 additional badges.
- JLPT N2** exam completed after **7 months** of Japanese study from beginner level; result expected late Sep 2026.
